GAME DEVELOPER | WEB DEVELOPER

Open to internship & junior roles

PROFILE

Information Technology student and aspiring game developer who builds browser games and websites with HTML, CSS, JavaScript and PHP. I turn ideas into playable, polished projects, and I am looking for an internship or junior role where I can learn and grow with a team.

EDUCATION

BS Information Technology (BS-IT)

Emerson University Multan

Currently in 3rd Semester

PROJECTS

Snake Game

HTML • CSS • JavaScript • Canvas

- Built a mobile-responsive Snake game with combo scoring, power-ups and progressively increasing speed.
- Supports keyboard, swipe and on-screen D-pad controls; best score is saved in the browser.

Space Shooter

HTML • CSS • JavaScript • Canvas

- Developed an arcade shooter with player movement, bullets, moving enemies and a score system.
- Implemented the main game loop and collision detection.

Memory Match

HTML • CSS • JavaScript • PHP

- Created a card-matching game with card-flip logic and win detection.
- Used PHP for the server-side part of the game.

Portfolio Website

HTML • CSS • JavaScript

- Designed a personal portfolio with a playable mini game, day/night mode and a project showcase.
